RE: Ballincurrig Septic Tank (A0361-01)

John,

I refer to the above mentioned facility and discharge licenced by the EPA.

The quality of the discharge from this septic tank to the Owenacurra River has being an ongoing cause of concern to IFI for some time and we have communicated this concern to Irish Water.

It is the opinion of IFI that immediate action is required to address the quality of the discharge from the septic tank to the Owenacurra River.

IFI would ask that the EPA investigate this matter

Yours sincerely,

Michael Mc Partland.
Environmental Officer.
