TO WHOM IT CONCERNS.

The following is a complaint regarding the unpalatable and disgusting stench which is for the past 2 weeks from the Corrig Gas Depot in Bellanaboy. This is seemingly the odour of human urine and is emanating from the area of the gate onto the main road. Fears in the locality are high in this resulting in an epidemic with dangers to the health of adults and children. Also contamination of water sources, a local ~~park~~ tourist area and walkway had to be vacated last week. And complaints from users. The responsible party, Shell EGP Ireland, are aware of this situation but not bothered to rectify it. The H.S.A. of Ireland are currently being advised of the situation, this letter is unsigned at the moment as the people involved and affected by this despicable behaviour are planning a demonstration at the gates and at the offices of Mayo County Council, if a immediate resolution is not forthcoming.
