Observations for EPA regarding application by Dublin Port Company for Dumping at Sea Permit.

1. Dublin Bay is a Protected Area:

Dublin bay is protected directly by 6 protected European sites that Bord Pleanala admits will be significantly affected by the dumping.			
Rockabill to Dalkey	SAC	EU code	003000
Lambay Island	SAC	EU code	000204
North Dublin Bay	SAC	EU code	000206
South Dublin Bay	SAC	EU code	000210
North Bull Island	SPA	EU code	004006
South Dublin Bay & Tolka	SPA	EU code	004024
Dublin Bay is also a Natura 2000 site			
Dublin Bay is now also a UNESCO biosphere reserve site			

2. The deterioration in water quality in Dublin Bay.

3. The Marine Strategy Framework Directive (MSFD)

(The granting of this licence would be contrary to the stated objectives of this directive).

4. Protection of Harbour Porpoise:

Burford Bank is an area used by the harbour porpoise, an animal protected under EC habitats directive (92/43/EEC).

5. Protection of Marine life:

6. No Proper Consideration to Alternatives:

7. Change in the typography

Silting causing lose of sea and erosion causing lose of mud and flat lands.

8. Increase Risk on Coastal and River Flooding by altering tidal pattern.

This large scale dredging and dumping of material at sea, so close to the coast indicates there is real potential for serious altering of tidal pattern.

Flooding: This combined with the effects of climate change could add to the dangers of more frequent flooding as the EIS states that there will be increased wave overlap on the Clontarf promenade by Dollymount and further up the river liffey.
