Subject: RE: Material Analysis - Arklow Energy

Suzanne,

I've reviewed the sediment chemistry for Arklow Banks. The sediment appears to be composed entirely of clean sand and I have no reservations about it being redistributed by plough dredge.

Best regards,
Margot

Subject: Material Analysis - Arklow Energy

Margot,

Please find attached the material analysis results from sampling carried out on the Arklow Bank.

The company proposes to carry out plough dredging in an area to the east of the turbines of the Arklow Bank Wind Park.

The full application can be viewed on our website at this [link](#).

I would appreciate if you could review the data and return any comments to me by **Friday 3rd February 2017**.

Regards,
Suzanne Wylde
