

Submission No. 15

EPA
Johnstown Castle Estate
County Wexford
Ireland

Scotstown
Ballyconnell
Co Cavan

To whom it concerns,

It is with regret that Quinn cement have rejected my request for a public meeting on the 2nd phase of their alternative fuel developement at Sootchtown Ballyconnell.

I find it difficult to understand why they do not want to share the many positive economic social and environmental benefits for the area [see submission no 14] with the whole Ballyconnell community.

I thrust you will take their unwillingness for a public metting into consideration when you are making your final decision on this development.

Yours Sincerely

Gerard McKiernan.

RE: Second Phase of Alternative Fuel Development at Ballyconnell Cement
(Your RE: Industrial Emission Licence P0378-04)

Dear Gerard,

Thank you for your letter (which I enclose) in response to Quinn Cement's invitation for you to visit the cement works and information room at Scotchtown, Ballyconnell.

I believe the best way for you to get a full appreciation of the process of environmental control at the plant and to understand what is proposed is for you to visit the plant. I am available to spend as much time as necessary with you and to make available all the resources in our information room as are all the management and workers at plant, most of which as you know also live locally.

I do hope you will take up our invitation at your convenience.

Yours Sincerely,

TP Feehan
