**Subject:** FW: Objection to EPA ref Licence Register PO516-04 - Boliden Tara Mines

Liz,

We have already sent in a couple of submissions as to why an IPC licence shouldn't be granted to Tara Mines – can you please add the below to this file also.

On reading the further information sent in by Boliden Tara Mines as requested by yourselves we noted that our farm/livelihood would be completely wiped out in the event of a Dam Break per the attached graph compiled for Boliden Tara Mines by Golder and Associates. We cannot even envisage the devastation that this would bring to our family – and it appears to us that this is a real possibility and we are thankful that you raised this issue with Boliden as we live with this grave fear. As these Maps are now in the public domain – what does this do to the value of our land are we now living on a Flood Plane?

We are farmers directly beside this Tailings Pond and this would destroy us if/when the attached occurs.

Regards

Joan and Peter Brady.
