Subject: RE: Material Analysis -Wexford Co Co (Kilmore Quay) S0030-01

Hi Ciara,

I've just realised I hadn't actually sent my comments on Kilmore Quay – my apologies.

I have reviewed the sediment chemistry. The material is almost entirely composed of sand, with some gravel. The results of the chemical analysis indicate that the material is clean, with no determinands at concentrations above the lower action levels.

In the absence of a beneficial alternative, given the relatively coarse nature of the sediment, I would have no objections to this material being dumped at sea.

Best regards,
Margot

Subject: Material Analysis -Wexford Co Co (Kilmore Quay) S0030-01

Hi Margot,

Please find attached the material analysis results from sampling carried out at Kilmore Quay.

Wexford County Council proposes to carry out maintenance dredging at mouth and entrance channel to the harbour at Kilmore Quay.

The full application can be viewed on our website at [this link](#).

I would appreciate if you could review the data and return any comments to me by **Friday 1st June 2018**, if possible.

Regards,
Ciara
