Objections & Concerns:

- Level of traffic with 80+ lorries per day passing through the village and on the Broadford Road, alongside the already heavy regular traffic on a daily basis
- Safety of pedestrians & cyclists – no footpaths / cycle ways for a lot of the road from Clonuff to the Mill Pond
- Safety of School children & Mass go-ers
- Vulnerability of the ground water – serious irreversible damage to the aquifer if this quarry is filled in. This has serious consequences for wells within a 20 mile radius for people / residents who are totally dependent on their own well water supply.
- Noise pollution from the non stop traffic
- We are aware of previous breaches of permission
- Higher level of dust and contamination
- Roads are not fit for purpose of proposed future traffic
- From the details provided, only 16% of houses within 500m radius of the site have had their water tested – this is not a fair reflection of the reality of the water pollution in the area.
- There appears to be no record held of the actual depth of the quarry itself. Serious concern here as there is poor security around the area which poses a serious public health hazard
- Concern around the negative impact of this proposal on the value of homes in the area.
- Under a previous archaeological report, where skeletal remains were discovered, it was agreed to preserve a green area – where will this be now??
