Dear Sir/Madame,

Please find below the the HSE Consultation report in relation to the above application.

If you have any queries regarding this report, the intital contact is Stephen Murphy, A/Principal Environmental Health Officer who will refer your query to the appropriate person.

The following HSE Departments were made aware of the consultation request for the proposed application on the 19th of February 2019:

- Emergency Planning-David O'Sullivan
- Estates-Helen Maher
- Assistant National Director for Health Protection-Kevin Kelleher/Laura Murphy
- CHO-Ger Reaney

Emergency Planning Report

- Please find enclosed the report from the Emergency Planning Department of the HSE.

Environmental Health Report

- The Environmental Health report is based on an assessment of documentation submitted to this office on the 19th of February 2019
- All commitments to future actions and further testing have been taken as read and all data results have been accepted as accurate.
- No additional investigations/measurements were undertaken.
- This report refers only to those sections of the documents which are relevant to the HSE.

Noise, Air and Water impacts of the proposed application have been assessed and examined by the Environmental Health Service.

The Environmental Health Service has no adverse comments to make in relation to this application once the proposed control and monitoring measures as outlined in the application are put in place and implemented.

All correspondence or any queries with regards to this report including any acknowledgement of this report should be forwarded to Stephen Murphy, A/Principal Environmental Health Officer, North Lee Environmental Health Department, HSE South, Floor 2, Block 1, St Finbarr's Hospital, Cork.

Yours Sincerely,

Stephen Murphy
A/Principal Environmental Health Officer

Shane O'Flynn
Environmental Health Officer

Proposal	Treatment / processing of milk greater than 200 tonnes per day		

HSE South Emergency Management Observations:

Please be advised that the HSE South Emergency Management function does not have any specific observations to make with respect to this application. However, please note the following recommendations within the context of site operations:

1. Should an incident occur at the site and the site operator requires the assistance of the emergency services, the incident information should be provided in the 'ETHANE' format (please see attached).
2. Emergency Services access to the site should be clearly identified. This should be undertaken via appropriate high visibility signage, i.e.; a green sign with a yellow border and white lettering citing the abbreviation RVP.
3. The site should have a mechanism in place to account for personnel during an evacuation in order to provide the responding emergency services with an estimate of the number of people accounted and unaccounted for.
4. The site should identify any critical / vulnerable facilities within the geographical catchment area, such as hospitals, schools, nursing homes, etc, that could be directly or indirectly affected by an incident at the site.
5. Where the 'off-site' impacts of an incident at the site affects a vulnerable cohort / population such as children within crèches, schools; patients / clients / residents within nursing homes, etc; the emergency services will require assistance from the site operator in determining the impact on the local community.
6. The site operator is encouraged to develop a business continuity plan that includes a plan for severe weather. For more advice on this, please see the Department of Business, Enterprise and Innovation, *Business Continuity Planning in Severe Weather*.
