To the Environmental Protection Agency submission in relation to application for a licence by Dairygold co-operative society Ltd and Tine Ireland Ltd for the emission of waste from there Mogeely Co.Cork facility

Reg no:P1103-01

We wish to strongly object to the Application to pump 4M Ltrs a day of FOG (Fats, Grease and Oils) at Rathcoursey

The claim is that the FOG/Grey water will be swept out to the open sea, However the thick scum from Midleton Sewage that lies on the surface of the water in many areas including below our family home shows that this obviously isn't the case, In the summer months at low tide you can smell the sewage that sticks in the mud in this particular area, Far from being swept out to sea.

Over the Years we have seen many boats break their moorings, On almost every occasion these boats end up washed up somewhere else within the harbour, Again not swept out into the open Sea!

The Long term effects need to be considered. This beautiful scenic area is already polluted too much and in a world where we are striving to be more environmentally conscious its improving the situation we should be and not further polluting it
