Dear Sir/Madam

I wish to make a submission/objection to licence (p519-04) and any other licences operated by Gyproc Saint Gobain Construction Ireland or any of its associated companies.

1 Blasting This is a major inconvenience and concern to me and my family and our home as the levels need to be greatly reduced as the damage already can be seen in the community from this with the subsidence which occurred

2 Noise disturbs and is a massive inconvenience to me and my family levels need to be greatly reduced

3 Water discharge no increase should be allowed due to impact it will have on the water quality in the river

4 Dust Both dust levels and blast fumes in community is not good for our trees our homes or any people of the community or the environment

5 all monitoring should be done by an external company with no affiliation to the company been monitored

Note

Blasting and Noise levels have caused lot of distress in our family we had planning permission to extend our family home but can no longer go ahead with it as the blasts are so bad we have been advised not to extend here as we already have had damage to our home with broken roof tiles and a smashed tempered glass shower screen which all have been reported to the epa. These issues have increased massively we feel our environment community and ourselves are not been protected.

Kind Regards

Angela Gartlan .
