Subject: Submission against the Gyproc license review application.

Dear sir/madam,

I am writing this submission against Gyproc and it's intention to obtain a license in order to continue to carry out its mining within our Parish. This mining has proved to be extremely stressful for all of the parish and undoubtedly should not be accepted to this degree.

As a young person this is a great worry for me. The land passed down for generations within my family has become devalued. I no longer have the confidence to build a house on land within the parish as well as many others.

As well as this the continuous noise and dust pollution is a great inconvenience. The noise pollution is extremely disrupting when trying to study for exams and the dust certainly does not help general community wellness especially amongst those in my family with already present lung problems. Certainly this parish is becoming less and less a place that invites and supports young people's development and futures solely due to Gyproc's mining activities.
