To the Environmental Protection Agency submission in relation to application for a licence by Dairygold co-operative society Ltd and Tine Ireland Ltd for the emission of waste from Mogeely Co.Cork facility Reg no:P1103-01

I wish to strongly object to the proposed application listed above.

I have lived for the last 33 years on the northern shore of Great Island and along with family and friends, and hundreds of thousands of others going back generations have been privileged to enjoy the unique and wonderful habitat and facility which is Cork Harbour. This harbour has to be carefully protected for the current and future generations.

I was delighted to receive in June 2019 a letter from the Department of Culture, Heritage and the Gaeltacht regarding the formal designation of Great Island Channel Special Area of Conversation, and noting the necessity of protection of the area under European Unions's Habitats Directive.

<http://www.irishstatutebook.ie/eli/2019/si/206/made/en/print>

How can a licence for industrial effluent disposal be even considered for granting in this Special Area of Conversation?

- What damage could be done to habitat, birds and the marine ecosystem in the harbour as a result of this?
- If the objective is that the effluent needs to be disposed of out to sea, why is it's journey starting deep in the inner harbour?
- As work is ongoing, and progress being made to clean up Cork Harbour in so many areas, what justifies the introduction of new effluent?
- There are other options for the treating and disposal of this effluent.

Yours sincerely

Olive Simonin
