Nature of Activity:

Classes and Nature of Activity in accordance with the EPA Act 1992 as amended			
Class of Activity	Main Activity	EPA Act Sector (where applicable)	Class of Activity Description
7.8 (a) (i)	No	Food and Drink	The treatment and processing, other than exclusively packaging, of the following raw materials, whether previously processed or unprocessed, intended for the production of food or feed from: only animal raw materials (other than exclusively milk) with a finished product production capacity greater than 75 tonnes per day;
7.4.1	Yes	Food and Drink	The operation of slaughterhouses with a carcass production capacity greater than 50 tonnes per day.

Introduction

The following HSE departments were notified of the consultation request for the licence application on 19th February 2021

- Emergency Planning – Brendan Lawlor
- Estates – Helen Maher
- Assistant National Director for Health Protection – Kevin Kelleher / Laura Murphy
- CHO – Ann O'Shea

This report only comments on Environmental Health impacts of the licence application.

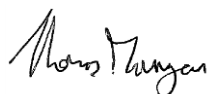

The Environmental Health Service (EHS) notes the complaint log for 2020 and a number of complaints regarding odour from the facility. The EHS would therefore like to consider the Environmental Management Systems (EMS) that are specified in BAT review as being implemented at the site. These do not appear to be available as part of the documentation submitted with the license review that are available on the EPA website.

If the EMS is made available to the EHS then a further submission will be made.

All correspondence or any queries with regard to this report, including acknowledgement of this report, should be forwarded to Ms. Rose McCaul, Acting Principal Environmental Health Officer, at the above address

Margaret Byrne
