22 April 2021

Re: EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Doneraile, Co. Cork

Your Ref: P0446-02 Our Ref: 21/92

Dear Sir/Madam,

Geological Survey Ireland is the national earth science agency and is a division of the Department of the Environment, Climate and Communications. We provide independent geological information and advice and gather various data for that purpose. Please see our website for data availability. We recommend using these various data sets, when conducting the EIAR, SEA, planning and scoping processes. Use of our data or maps should be attributed correctly to 'Geological Survey Ireland'.

With reference to your email dated 23 March 2021, concerning the EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Concerning the EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Concerning the EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Concerning the EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Concerning the EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Concerning the EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Concerning the EPA Licence Application / Review for an industrial emissions licence (intensive agriculture) at Annakisha North, Concerning the EPA Licence Application / Review for an industrial emission industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission in the EPA Licence Application / Review for an industrial emission

Geoheritage

Geological Survey Ireland is in partnership with the National Parks and Wildlife Service (NPWS, Department of Housing, Local Government and Heritage), to identify and select important geological and geomorphological sites throughout the country for designation as geological WHAs (Natural Heritage Areas). This is addressed by the Geoheritage Programme of Geological Survey Ireland, under 16 different geological themes, in which the minimum number of scientifically significant sites that best represent the theme are rigorously selected by a panel of theme experts.

County Geological Sites (CGSs), as adopted under the National Heritage Plan, include additional sites that may also be of national importance, but which were not selected as the very best examples for NHA designation. All geological heritage sites identified by Geological Survey Ireland are categorised as CGS pending any further NHA designation by NPWS. CGSs are now routinely included in County Development Plans and in the GIS of planning departments, to ensure the recognition and appropriate protection of geological heritage within the planning system. CGSs can be viewed online under the Geological Heritage tab on the online Map Viewer.

The audit for Co. Cork has not yet been completed, however unaudited CGSs can be viewed online under the Geological Heritage tab on the online <u>Map Viewer</u>. **Our records show that there are no unaudited CGSs in the vicinity of the pig farm.**

Groundwater

Geological Survey Ireland's <u>Groundwater and Geothermal Unit</u>, provides advice, data and maps relating to groundwater distribution, quality and use, which is especially relevant for safe and secure drinking water supplies and healthy ecosystems.

Proposed developments need to consider any potential impact on specific groundwater abstractions and on groundwater resources in general.

We recommend using the groundwater maps on our <u>Map viewer</u> which should include: wells; drinking water source protection areas; the national map suite - aquifer, groundwater vulnerability, groundwater recharge and subsoil permeability maps.

For areas underlain by limestone, please refer to the karst specific data layers (karst features, tracer test database; turlough water levels (gwlevel.ie). Background information is also provided in the Groundwater Body Descriptions. Please read all disclaimers carefully when using Geological Survey Ireland data.

The Groundwater Vulnerability map indicates the area is classed as 'Rock at or near surface' and the area is underlain by a 'Locally Important Aquifer - Bedrock which is Moderately Productive only in Local Zones'. An aquifer categorised as a 'Regionally Important Aquifer - Karstified (diffuse)' is situated 1km from the piggery.

If the waste arising from the intensive piggery is being landspread, it should comply with the Licensed Landspreading Groundwater Protection Response and indicated site assessment requirements for the particular groundwater vulnerability, aquifer and source protection area setting, as well as the relevant current EPA guidelines.

The Groundwater Protection Response overview and link to the main report is here: https://www.gsi.ie/en-ie/programmes-and-projects/groundwater-and-geothermal-unit/projects/protecting-drinking-water/what-is-drinking-water-protection/county-groundwater-protection-schemes/Pages/default.aspx.

The Licensed Landspreading document is here:

https://www.gsi.ie/documents/Groundwater_Response_Matrix_for_Landspreading_of_Organic_Waste.pdf.

Geological Mapping

Geological Survey Ireland maintains online datasets of bedrock and subsoils geological mapping that are reliable and accessible. We would encourage you to use these data which can be found here, in your future assessments.

I hope that these comments are of assistance, and if we can be of any further help, please do not hesitate to contact me, Clare Glanville (<u>Clare.Glanville@gsi.ie</u>), or my colleague Trish Smullen, (<u>Trish.Smullen@gsi.ie</u>)

Yours sincerely,

Clare Glanville

Senior Geologist

Geological Survey Ireland

Clarefille
