Subject: Great island application

Dear sír

I wish to object to the application from sse great island. The vast amounts of foam coming from the plant is undoubtedly impacting fin fish. Contamination of fishing nets and effectively preventing fish from areas where prior to this pollution fish were found this has impacted incomes as well as environmental damage. Fish have been filmed coming true the system in large quantities. Shell fish and in Peticurly eggs have been severely in decline.. Couple sse great island co wexford with dredging and bed levelling of the estuary plus wet land destruction also mindful of the plyboard out flow pipe and glanbia plant at bellview a perfect storm of environmental issues arise. Heretofore the EPA have been found wanting in protecting the environment the use and proposed further use of community gain funds and further monies is resulting in a culture of turning a blind eye by community groups who benefit from funds. This is further complicated when individuals who have connections to companies such as lisheen mines glanbia and sse are added to the mix.. The loser is the environment and traditional fishing

Yours sincerely
Sean Doherty
