Re: Industrial Emissions Licence Application from Millrace Poultry Ltd, Tullyard, Co Monaghan

Your Ref: P1158-01 Our Ref: 21/270

Dear Sir/Madam,

Geological Survey Ireland is the national earth science agency and is a division of the Department of the Environment, Climate and Communications. We provide independent geological information and advice and gather various data for that purpose. Please see our website for data availability. Use of our data or maps should be attributed correctly to 'Geological Survey Ireland'.

With reference to your email dated 22 July 2021, concerning the Industrial Emissions Licence Application from Millrace Poultry Ltd, Tullyard, Co Monaghan, Geological Survey Ireland would encourage use of and reference to our datasets. Please find attached a list of our publicly available datasets. We recommend that you review this list and refer to any datasets you consider relevant to your assessment. The remainder of this letter and following sections provide more detail on some of these datasets.

We are pleased to see use of our Bedrock, Groundwater Aquifer and Vulnerability datasets within the EIAR. PUTPOSE

Geoheritage

OUIT Geological Survey Ireland is in partnership with the National Parks and Wildlife Service (NPWS, Department of Housing, Local Government and Heritage), to identify and select important geological and geomorphological sites throughout the country for designation as geological NHAs (Natural Heritage Areas). This is addressed by the Geoheritage Programme of Geological Survey Ireland, under 16 different geological themes, in which the minimum number of scientifically significant sites that best represent the theme are rigorously selected by a panel of theme experts. Con

County Geological Sites (CGSs), as adopted under the National Heritage Plan, include additional sites that may also be of national importance, but which were not selected as the very best examples for NHA designation. All geological heritage sites identified by Geological Survey Ireland are categorised as CGS pending any further NHA designation by NPWS. CGSs are now routinely included in County Development Plans and in the GIS of planning departments, to ensure the recognition and appropriate protection of geological heritage within the planning system. CGSs can be viewed online under the Geological Heritage tab on the online Map Viewer.

The audit for Co. Monaghan was carried out in 2013. The full report details can be found here. Our records show that there are no CGSs in the vicinity of the poultry farm.

Groundwater

Geological Survey Ireland's Groundwater and Geothermal Unit, provides advice, data and maps relating to groundwater distribution, quality and use, which is especially relevant for safe and secure drinking water supplies and healthy ecosystems.

Proposed developments need to consider any potential impact on specific groundwater abstractions and on groundwater resources in general. We recommend using the groundwater maps on our Map viewer which should include: wells; drinking water source protection areas; the national map suite - aquifer, groundwater vulnerability, groundwater recharge and subsoil permeability maps. For areas underlain by limestone, please refer to the karst specific data layers (karst features, tracer test database; turlough water levels (gwlevel.ie).

An Roinn Comhshaoil, Aeráide agus Cumarsáide Department of the Environment, Climate and Communications

Background information is also provided in the Groundwater Body Descriptions. Please read all disclaimers carefully when using Geological Survey Ireland data.

The Groundwater Vulnerability map indicates the area is classed as 'Extreme' and 'Rock at or near surface' and the area is underlain by a 'Poor Aquifer - Bedrock which is Generally Unproductive except for Local Zones'.

The Groundwater Protection Response overview and link to the main report is here: https://www.gsi.ie/enie/programmes-and-projects/groundwater-and-geothermal-unit/projects/protecting-drinking-water/what-isdrinking-water-protection/county-groundwater-protection-schemes/Pages/default.aspx.

Geohazards

Geohazards can cause widespread damage to landscapes, wildlife, human property and human life. In Ireland, landslides, flooding and coastal erosion are the most prevalent of these hazards. We recommend that geohazards be taken into consideration, especially when developing areas where these risks are prevalent, and we encourage the use of our data when doing so.

The Landslide Susceptibility map indicates variable landslide susceptibility close to the poultry farm, including a small area of 'Moderately High' susceptibility. Geological Survey Ireland has information available on landslides in Ireland via the National Landslide Database and Landslide Susceptibility Map both of which are available for viewing on our dedicated Map Viewer. Associated guidance documentation relating to the National Landslide Susceptibility Map is also available.

I hope that these comments are of assistance, and if we can be of any further help, please do not hesitate to Consent of convingition net required contact me Clare Glanville, or my colleague Trish Smullen at GSPlanning@gsi.ie.

Yours sincerely,

clare julles

Clare Glanville Senior Geologist **Geological Survey Ireland**

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Dear Sir/Madam,

In accordance with the provisions of the applicable licensing regulations, you are being routinely notified that an application for a licence, details of which are set out below, was received by the Agency on 20 July 2021.

- Licence Type:
- Name and address of applicant:
- Location of installation:
- Reference No:
- EIS/EIAR submitted:

Industrial Emissions (IE)

Millrace Poultry Limited, Tullyard, H18 AH60, Monaghan, Monaghan

Tullyard, Monaghan, Monaghan, H18 AH60

P1158-09 Wesquire

- EIS/EIAR	submitted:	ind	1 Vesuire			
- EIS/EIAR submitted: - Planning Authority to whom EIS/EIAR has been submitted: - Planning Authority to whom EIS/EIAR has been submitted: - EIS/EIAR ha						
<u>Classes ar</u>	Classes and Nature of Activity in accordance with the EPA Act 1992 as amended EPA Act EPA Act					
Class of Activity	Main Activity	Sector (where applicable)	Class of Activity Description			
6.1 (a)	Yes	Intensive Agriculture	The rearing of poultry in installations where the capacity exceeds 40,000 places.			

The EIS/EIAR is available for public inspection on the EPA website alongside

- any information provided to the Agency under paragraph (e) or (f)(ii)(II) of section 83(2A) of the i. EPA Act 1992;
- any opinion issued by the Agency under section 83(2A)(de) of the EPA Act 1992 on the scope of ii. the environmental impact assessment report.
- any further information, including reports and advice, relating to the environmental impact iii. assessment as may be furnished to the Agency in the course of the Agency's consideration of the application.

Submissions may be made in writing to the Agency in relation to the likely effects on the environment of the proposed activity within the period specified by the Agency on its website under Regulation 4(2)(c) of the licensing regulations.

The application is being processed by the Agency and you will be notified of the decision in due

course. In this regard any comments in relation to this application should be forwarded to the Agency as soon as possible. A copy of the application and associated correspondence are available for public inspection on the Agency's website <u>www.epa.ie</u>.

Please direct any queries that you may have in relation to the above to licensing@epa.ie.

Please note that there is no requirement for you to acknowledge receipt of this notice.

If you have no comments to make in relation to this application, there is no requirement for you to reply to the Agency.

Yours sincerely,

Environmental Licensing Programme Office of Environmental Sustainability
