EPA Objection – Ref P1165-01

To whom it may concern,

We would like to make a submission in relation to application P1165-01 by Data and Power Hub services.

As local resident we would have grave concerns with the operation of such a facility in close proximity to our family home.

This facility will generate its own power using its own power station which will have emissions that over a period of time could have a damaging effect on air quality in the surrounding area. There is also the danger from explosion due to malfunction in the battery storage or overheating of the facility.

Another concern is a continuous low grade hum from a facility of its type which in a tranquil area would have a detrimental effect on the quality of life for those around it.

We have already put a submission to South Dublin County Council on application SD20A/0324 outlining our concerns.

We would like to ask you not to issue an operating licence as it would have a detrimental effect on life in the area.

Thank you.
