**Subject:** Re: Port of waterford amendment

As checkpoint boat club/ Port of Waterford . We're untruthful in there original Environmental impact statement where they clearly stated no dredging was required.. it was always inevitable extra dredging would be required to install a pontoon at checkpoint but also regular maintenance dredging will also be required.... this puts more pressure on the eco system documents show checkpoint boat club/port of waterford have mislead ABP the public and local authority...however more serious questions exist regarding the granting of planning permission by an bord@pleanala

As there is currently a investigation in to ABP and more allegations being made daily the matter checkpoint boat club is currently with a senior council CBC its chairman Mr John Victor Whitty is a senior employee of waterford port company .waterford port company /checkpoint boat club have provided information they know to be untruthful. On the 6th of May a port of waterford of waterford employee in writing to a official body informed them that ALL permissions were in place . Is EPA now similar to an bord planalia comprised by conflict of interest at a public meeting in checkpoint Co waterford when asked about appeals to ABP

It was stated not to worry planning is in the bag... I remind you on the may 6th Mr Whitty is so certain that the licence applied for will be granted by EPA that he puts it in writing . Tonight it's been published that the installation of a pontoon at checkpoint is to commence first week of June... ..I believe the EPA to have any credibility must inform port of waterford/ checkpoint boat club that the licence process has not even closed no decision made ... and in the event of a grant of permission its subject to judicial review.. I request this email be made part of a objection
