

To whom it concerns,

I am submitting this to give my disapproval and complain about the smell that can only be described as sickening and disgusting. Ferrybank is a medium size village and where this meat plant APB is located is very central. On this road there are two schools nearby, (a girls NS and secondary school). There is also a business park that has shops that people drive by to get too.

It is particularly bad in the hot weather. I have no issue with the plant being in this location if all standards are up to date but it is clearly not.

I urge you to hold off on giving this plant a renewal license until everything is up to standard and 100% standard. There can be no error of any kind especially when it comes to air quality for our community.

Thanks

Damien Donoghue
