**Subject:** Applicant Name: Anglo Beef Processors Ireland Unlimited Company Register Number: P0040-03

To whom it may concern,

Proposed Licence No. P0040-03 Applicant Name: Anglo Beef Processors Ireland Unlimited Company

I object to the proposed increase of this company's rendering activities. I am a resident in Ferrybank. I feel it's not healthy for my family and community to breathe in poor quality air each day. The Ferrybank community are affected by the stench from the trucks passing through on route to the ABP rendering plant. An increase of production by 60% as the plant requests will have repercussions for the Ferrybank and Waterford communities in relation to Air Quality. I wish to object to the application in light of ABP's current inability to prevent the emanation of extremely foul smells from both their plant in Christendom and the transport trucks which affects the community at large.

The plant needs to be monitored by the EPA and run according to tight existing regulations. The existing problems with the stench from the plant and the trucks needs to be fully controlled before the licence is renewed. In my opinion the air quality of the community living here including children and the location of the plant being near schools is of most importance when reviewing ABP's licence and request to increase production.

We, the community, need the EPA and other state bodies to provide the support and proper monitoring of the rendering plant so that we can enjoy clean fresh air and a stench free environment.

Kind regards

Rory O'Ferrall
