Complaint Description and Location

Complaint Detail: As a Christendom Estate residents we experience very poor air quality and horrible smell from the factory nearly everyday. We try to close the windows when the smell becomes very bad but it does not always work. Sometimes its so bad that it is inside the house too. My child is very sensitive to the smells he gets vomiting when the smell is that bad. I've got migraines since we moved to the area. And we are thinking to move away because of the factory. But because of the housing crisis it's so difficult to do unfortunately. There are 117 houses in our estate and the majority of them are working families with one or few kids. We have tens of kids playing outside everyday during good weather. And I don't know how is that related but the worst smells are usually on a nice sunny days. All children have no other option as to breath that stinky horrible smell. It's absolutely disgusting smell of dead animals.

Trucks that come to the factory cross 2 schools on their way. One thing they come as close as 15 cm away from walking pathway where kids are going to or from school. They leave spillages quite often that small so badly for a long time. The health and safety of our children is neglected absolutely. The narrow pathway is dangerous itself as it's for one person walking size wide. When parents try to walk with the pram and meet somebody on their way they have to go on the roadway. Kids walking from school can push each other or accidently fall under those trucks one day. I know it's another problem we have here in Ferrybank. But my point is those disgusting smelly trucks are driving just right beside those kids and people walking on that only narrow and dangerous pathway. The smell is difficult to explain how bad it is. It literally making people of all ages vomit, people get headaches and the quality of their life is very low because of that.

To resolve the issue instead of hundreds of families moving away, the factory has to be closed there.
