Dear Sir/Madam

I am writing to inform you of the applicant's miscalculation of forecasted slurry figures.

The EIS states that 600 sows currently produce 15681 m<sup>3</sup>/annually and the proposed increase to 1000 sows will produce 15805 m<sup>3</sup>/annually. A moment's reflection indicates that this is a gross underestimation of the true slurry output.

Yours faithfully,

Kunal
