Subject: Objection to applications for intensive farming

To whom it may concern,

I am objecting to the following applications on the grounds that factory farming, or intensive agriculture, is seriously damaging the environment. The systems currently in place in the respective counties of the applicants are insufficient to deal with the current level of animal agriculture. Approving licenses for additional intensive farming would be wilfully destroying the land and the environment and putting peoples health at risk.

Separately it is cruel to farm animals in this manner. It's raises questions around the health of the animals and and therefore the end product that is being sold to humans. It is putting smaller farmers out of business.
