Subject: RE: EPA Notification – Licence Application/Review Received EPA043994

Ref: P1193-01 EPA043994

Good morning,

Please find below the nature conservation recommendations on the above referral.

While screening for Appropriate Assessment and in terms of consideration of the effects of nitrogen deposition on bog ecosystems, in particular, it appears that the applicants did not consider the cumulative effects of nitrogen emissions from the proposed development to be licenced in conjunction with other emissions in the locality including agriculture, transport and other sources.

This should be addressed by the EPA licence assessment process.

Kind regards,

Edel Griffin
Executive Officer
