Subject: Application for a Waste Water Discharge licence review by Irish Water at Macroom, Co.Cork. Reference No: D0126-02 EPA043076

A chara,

Thank you for your recent notification of the above reference application.

The Sullane River, the receiving water for effluent from Macroom WWTP, is a significant salmonid spawning and nursery water. In the context IFI would ask the EPA to ensure that current actual background data is applied when calculation of the assimilative capacity relative to legislative requirements is carried out as part of the licence application. The use of a 'notionally clean river approach' is neither sustainable or appropriate .

Michael Mc Partland
Senior Fisheries Environmental Officer.
