Re: Dumping At Sea S0012-05

To whom it may concern,

I am writing to express my strong support for the Port of Waterford's Dumping at Sea Application S0012-05. Granting this permit is vital for the port's operations, renewable energy projects, employment opportunities, and the economic growth of the South East region.

As a key stakeholder in the Port of Waterford, our company relies heavily on the port's facilities. Denying this permit would not only hinder our operations but also impact our commercial relationships and ability to attract new customers.

Furthermore, accommodating larger vessels is crucial for the port's competitiveness and efficiency. Without this capability, both port users and the regional economy would suffer.

Given our significant investments in the Port of Waterford, we urge the approval of this application to ensure the port's continued success and the promotion of employment opportunities in the area.

Thank you for considering our support.

Yours sincerely,

Signed: *Brendan Teddon*
