Subject: S0005-03 Roche's Point Dump Site Dumping at Sea Licence application

A Chara,

Below please find the Archaeological recommendations.

It is noted that the application incorporates an Underwater Archaeological Impact Assessment (UAIA) report which was carried out in relation to the proposed development by Mizen Archaeology (Caityln Haskins, July 2022). NMS has reviewed the UAIA and is broadly in agreement with the findings and mitigation in relation to underwater archaeology as set out therein. Therefore, the National Monuments Service (NMS), Department of Housing, Local Government and Heritage advises that the following should be included as a condition of any grant of DaS licence.

Archaeological Requirements:

1. All mitigation measures in relation to archaeology and cultural heritage as set out in Section 7 of the submitted Underwater Archaeological Impact Assessment by Mizen Archaeology (July 2022) shall be implemented in full, except as may otherwise be required in order to comply with the conditions of this Licence.
2. The Construction Environment Management Plan (CEMP) shall include the location of any and all archaeological or cultural heritage constraints relevant to the proposed development as set out in the UAIA and by any subsequent archaeological investigations associated with the project. The CEMP shall clearly describe all identified likely archaeological impacts, both direct and indirect, and all mitigation measures to be employed to protect the archaeological or cultural heritage environment during all phases of site preparation and construction activity.
3. The National Monuments Service of the Department of Housing, Local Government & Heritage shall be furnished with a final archaeological report describing the results of all archaeological monitoring and any archaeological investigative work/excavation required, following the completion of all archaeological work on site and any necessary post-excavation specialist analysis. All resulting and associated archaeological costs shall be borne by the developer.

Reason: To ensure the continued preservation (either *in situ* or by record) of places, caves, sites, features or other objects of archaeological interest.

Regards,

Simon Dolan
