Dear Ms Oglesby,

My Office has reviewed the above planning application and has made the following observations regarding the proposed development. This report refers only to those sections of the planning documents which are relevant to the HSE and have an Environmental Health impact.

Other stakeholders within the HSE were consulted and have indicated they have no objection to this development.

The site is contained within a brown field/industrialised area. There is an existing bottle blowing section on site and the proposed works will expand upon the existing structure. The reports attached to the application on wastewater, water treatment, air and noise control indicate that any emissions fall within existing operational limits and are not cause for concern. The expansion of the existing business is not of concern to this office.

If you have any queries regarding this consultation report please contact me.

Yours sincerely,

Yours sincerely

Declan Roe
Principal Environmental Health Officer

The Health Service Executive is continually striving to improve the quality of its service. If you have any feedback on your recent interaction with the National Environmental Health Service please contact the Principal Environmental Health Officer on the above phone number.
