21st March 2024

To whom it may concern,

I am writing to express our full support for the Port of Waterford's Dumping at Sea Application S0012-05. Granting this permit is vital for the port's continued operations which provide vital employment and enterprise which are crucial for the economic growth of the South East region.

As a construction materials company, we rely on the efficient functioning of the Port of Waterford for importing materials and products. Denying this permit would hinder the importation of low carbon building materials which are vital for a low carbon growing construction industry.

Given the significant investments our company has made in the Port of Waterford, we strongly urge the approval of this application to sustain the port's operations and the promotion of employment opportunities in the area.  
Thank you for considering our support.

Your Sincerely

Martin O'Brien  
Director
