AVR – Environmental Solutions Ltd. requests a refund under the Waste Management Acts 1996 to 2003 upon successful completion of the waste licence application process for the proposed Waste Recovery/Transfer and Sludge Drying Facility. This facility is a private venture being capitalised by private funds and will play a vital role in development of sustainable waste management solutions. It will accept sludge from a sector that needs to significantly reduce its dependence on landspreading and disposal to landfill. With this in mind, we would urge you to exercise your discretionary power under Part VII, Section 45, of the Waste Management (Licensing) Regulations 2004, S.I. No. 395 of 2004, which states:

45. (1) Notwithstanding any other provision of these Regulations, the Agency shall have an absolute discretion to refund or waive up to half of any fee payable in respect of a particular application where it is satisfied that the payment in full of the fee would not be just and reasonable having regard to the relevant circumstances of the activity.

(2) A decision under sub-article (1) shall contain a statement specifying the reasons for the decision.

We therefore suggest that a 50% refund of fee would be appropriate.

Finally we look forward to meeting you at your convenience to present this application for a waste licence and supply any additional information deemed necessary by the EPA.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Aoife Foley", written over a horizontal line.

PROCEDURES

It is recommended that pre-application consultations with the Agency are undertaken before a formal submission of the waste licence application.

The procedure for making and processing of applications for waste licences, and for the processing of reviews of such licences, appear in the Waste Management (Licensing) Regulations 2004 (S.I. No.395 of 2004) and are summarised below. The application fees that shall accompany an application are listed in the Second Schedule to the Regulations.

Prior to submitting an application the applicant must publish in a local newspaper, and erect on site, a notice of intention to apply. An applicant, other than a local authority in whose functional area the development is located, must also notify the Local Planning Authority, in writing, of their intention to apply.

An application for a licence must be submitted on the appropriate form (available from the Agency) with the correct fee, and should contain relevant supporting documentation as attachments. The application should be based on responses to the form, supporting written text and the appropriate use of tables and drawings. Where point source emissions occur, a system of unique reference numbers should be used to denote each emission point. These should be simple, logical, and traceable throughout the application.

The application form is divided into a number of sections of related information. The purpose of these divisions being to facilitate both the applicant and the Agency in the provision of the information and its assessment. Attachments should be clearly numbered, titled and paginated and must contain the required information as set out in the application form. Additional attachments may be included to supply any further information supporting the application. Any references made should be supported by a bibliography.

All questions should be answered. No waste management facility is exactly the same and hence each application will require different information. It is therefore possible that some of the sections of this application form may not be relevant to the activity concerned. **Where information is requested in the application form, which is not relevant to the application, the words “not applicable” should be clearly written on the form. The abbreviation “N/A” should not be used.**

Additional information may need to be submitted beyond that which is explicitly requested on this form. Any references made should be supported by a bibliography. The Agency may request further information if it considers that its provision is material to the assessment of the application. Advice should be sought from the Agency where there is doubt about the type of information required or the level of detail.

Information supplied in this application, including supporting documentation will be put on public display and be open to inspection by any person. **Should the applicant consider information to be confidential, then the nature of this information, and the reasons why it is considered confidential should be clearly stated in an attachment to the Application Form. This information should be submitted in a separate enclosure bearing the legend “In the event that this information is deemed not to be held as confidential, it must be returned to (representative of the applicant)”.**

Applicants should be aware that a contravention of the conditions of a waste licence is an offence under Section 39 of the Waste Management Acts 1996 to 2003.

The provision of information in an application for a waste licence which is false or misleading is an offence under Section 45 of the Waste Management Acts 1996 to 2003.

Note: Drawings. The following guidelines are included to assist applicants:

- *All drawings submitted should be titled and dated.*
- *They should have a unique reference number and should be signed by a clearly identifiable person.*
- *They should indicate a scale and the direction of north.*
- *All drawings should, generally, be to a scale of between 1:20 to 1:500, depending upon the degree of detail needed to be shown and the size of the facility. Drawings delineating the boundary can be to a smaller scale of up between 1:1000 to 1:10560, but must clearly and accurately present the required level of detail. Drawings showing the site location can be to a scale of between 1:50 000 to 1:126 720. Provide legends on all drawings and maps as appropriate.*

Applicants must submit a signed original of the completed application, plus three copies (two copies where the application is by a local authority in respect of the carrying on of an activity located within the functional area of the authority)¹. In cases where an Environmental Impact Statement (EIS) is required then the Agency must be supplied with three copies of the EIS. In addition the applicant must submit one copy of the complete application on a CD-ROM, and eleven CD-ROM copies of the EIS to the Agency. The e-files should be saved as a ‘pdf’ file, read only status.

The provision of information in an application for a waste licence, which is false or misleading, is an offence under s45 of the Acts.

Maximum Annual Tonnage (tpa)	110,500
Year	2011

B.7.3 FEES

State each class of activity for which a fee is being submitted as per Part I of the Second Schedule of the Waste Management (Licensing) Regulations 2004, S.I. No. 395 of 2004. Note: two fees are required if disposal and recovery are to occur.

Waste Activity	Fee (in €)
Disposal of Waste (appropriate disposal activity 1.1 – 3.3)	
Recovery of Waste (4)	20,000

A refund is requested under the Waste Management Acts 1996 to 2003. This facility is a private venture being capitalised by private funds and will play a vital role in the waste handling. It will accept sludge from a sector that needs to significantly reduce its dependence on landspreading and disposal to landfill. With this in mind, we would urge you to exercise your discretionary power under Part VII, Section 45, of the Waste Management (Licensing) Regulations 2004, S.I. No. 395 of 2004, which states:

45. (1) Notwithstanding any other provision of these Regulations, the Agency shall have an absolute discretion to refund or waive up to half of any fee payable in respect of a particular application where it is satisfied that the payment in full of the fee would not be just and reasonable having regard to the relevant circumstances of the activity.

(2) A decision under sub-article (1) shall contain a statement specifying the reasons for the decision.

We therefore suggest that a 50% refund of fee would be appropriate.
