**Re: Review of Waste Licence 47-1 (Application File Reference No. 47-2)**

Dear Dr. Derham,

I am writing on behalf of our client, Neiphin Trading Ltd.

I am writing with regard to the Application for a Waste Licence Review for the Integrated Waste Management Facility in Kerdiffstown, Co. Kildare (Application File Reference No. 47-2). This application was lodged with the Agency in July 2004.

Our client would like to request an amendment to Condition 1.4 of waste licence 47-1 and seeks the Agency's consent to accept recyclable household wastes at the facility for recovery.

Our client would like this amendment to be included for consideration in the waste licence review application process. These wastes will have a similar composition to the Commercial and Industrial wastes currently authorised for recovery at the facility and therefore would be processed in the same manner.

Any residual wastes arising as a result of the recovery process will be disposed of in the lined landfill. In the event that there is cross contamination with household organic wastes the wastes will be placed in the quarantine area prior to removal to Ballealy Landfill. In due course it is proposed that any residual organics from this waste stream will be

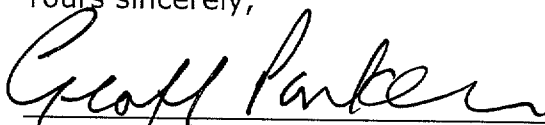

treated in the proposed composting facility once it is built and operational (subject to the Agency's agreement).

The acceptance of these wastes at the facility will greatly assist in the recovery of all wastes in County Kildare.

We are also currently completing our response to your request for further information and intend to complete it by the end of the month.

Please feel free to contact me if you have any further queries.

Yours sincerely,

  
Geoff Parker M.E.Sc., M.I.E.I., M.I.W.M.
