**Attachment H9 — Discharges to Surface Water**

See Section 4.6 of the EIS.

**Attachment H10 — Discharges to Sewer**

The site is not serviced by the public sewer. Domestic sewage is discharged to a septic tank which discharges to a percolation area. All waste is processed indoors and kept dry at all times. Any leachate is collected and diverted to a underground foul water tank. Foul water is spread on lands owned by Seamus Kelly.
