

B.7 - Type of Waste Activity, Tonnages and Fees

B.7.1 Third and Fourth Schedules of the WMA 1996 to 2003

The facility is involved in a number of waste recovery and waste disposal activities as defined in the Third and Fourth Schedule of the Waste Management Act, 1996 (WMA).

Waste Disposal Activities - Third Schedule of WMA

11. Blending or Mixture prior to submission to any activity referred to in this Schedule.

Residual commercial, domestic and industrial wastes are bulked up at the facility for transfer to landfills.

12. Repackaging prior to submission to any activity referred to in a preceding paragraph of this Schedule.

Some wastes may be baled prior to transfer to landfill.

13. Storage prior to submission to any activity referred to in this (Third) Schedule, other than temporary storage, pending collection, on the premises where the waste concerned is produced. All wastes are temporarily stored at the site prior to bulking and transfer. The residual wastes will be transferred to landfill. As the waste is not produced at the site, storage of residual waste at the site falls within this category.

Waste Recovery Activities - Fourth Schedule of WMA

2. Recycling or reclamation of organic substances which are not used as solvents (including composting and other biological transformation processes.) This is the principal activity at the site and includes the segregation and recovery of materials such as cardboard, paper, textiles, wood and any putrescible wastes.

3. Recycling or reclamation of metals and metal compounds. Steel and other metals are removed mechanically and/or manually from the construction and demolition waste at the site and recycled by scrap merchants.

4. Recycling or reclamation of other inorganic materials. This is the principal activity at the site and includes the segregation of commercial, industrial, construction and demolition wastes.

13. Storage of waste intended for submission to any activity referred to in a preceding paragraph of this (Fourth) Schedule, other than temporary storage, pending collection, on the premises where the such waste is produced. All recovered wastes are temporarily stored at the site prior to recycling or reclamation activities. As the waste is not produced at the site, storage at the site falls within this category.

B.7.2 Maximum Annual Tonnage

The maximum annual tonnage to be processed at the facility will be 95,000 tonnes/annum.

B.7.3 Fees

The appropriate fees are enclosed.
