Re: Submission of information for review of Licence 177-2.

To whom it may concern,

Please find attached a copy of the proposed waste types and quantities to be accepted at the ONYX Ireland Ltd. facility as requested by the Agency in accordance with the review of waste licence 177-2.

ONYX are requesting that the total tonnage of waste to be accepted at the facility increase to 31,250 tons per annum from the current licence limit of 25,000 tons as apposed to 29,000 tons previously stated in the licence review application 06/12/04.

Also find attached a copy of confirmation from Waterford City Council with regards to an EIS not being required as part of the planning application No.03/723 for an extension to the facility.

I hope that this is to your satisfaction.

If you require any additional information please contact me.

Yours Sincerely,

Michael Storan
Environmental Officer

RE: Planning Application ref. No. 03/723
IPODEC Ireland Ltd., Site at Six Crosa Roads, Waterford.

Dear Sir or Madam:

I refer to the above application, which comprised alterations to the site boundary, the construction of a new vehicular entrance, relocation of the existing weighbridge, the construction of an open-sided shed and associated site works. The premises in question undertake activities which are subject for a Waste Licence. Waterford City Council in considering the application determined that the character and nature of the works proposed were enabling works related to the licensed activity already present on the site and as such an Environment Impact Assessment was not required.

Yours faithfully,

M. Walsh,
Director of Services
