Re: Waste licence application, Bray Depot at Fassaroe, Bray, Co. Wicklow.

Dear Miss Bosley,

Please find the Boards comments outlined below regarding the above proposed waste licence review:

- The County Brook, which runs through the Fassaroe site, is a salmonid system and a tributary of the River Dargle. The River Dargle is an EU Designated Salmonid System. Preventing any polluting matter from entering this river, must be a key component of any waste licensing process.
- The highly polluting nature of the wastewaters potentially generated at this facility highlights the need for implementation of comprehensive foul and surface water management measures in order to safeguard the ecological integrity of local surface waters. Under no circumstances should there exist the possibility of cross-contamination of the **two** waste water streams, neither should there be any scope for **foul** water entry to the local surface water system.

I trust you will take our concerns on board.

Yours sincerely,

Brian Beckett
Fisheries Environmental Officer – Dublin District
