21 July 2006

Dear Mr Buckley

The register numbering system for Waste licence applications has changed to a new format, effective from July 2006. The new format has been introduced following a review of the operation of the licensing system. The new numbering system applies to all applications currently being determined by the Agency and all licences issued to-date. The Agency is confident that the changes will lead to the provision of a high quality service to its clients and stakeholders and help meet their expanding and increasing needs.

Specific details are as follows:

Waste Applications/Licences

- All reg. numbers now start with a W.
- Extra digits (**zeros**) have been added to reg. numbers so that the main body of the reg. number has four digits, followed by a two digit sequence number i.e.:

Facility Name	Old Waste Reg No	New Waste Reg No	Licence Status
Greyhound Recycling & Recovery Limited	205-1	W0205-01	Applied

This new number will be used for correspondence and reference purposes and you are requested to use it in all future correspondence or other contact with the Agency. You should take this opportunity to advise all your staff and representatives of the change as appropriate so that they are also fully aware of the matter.

Benefits of Renumbering

The benefits of the new numbering format are as follows:

- Show the application type in the register number (W = Waste, P = IPPC).
- Show IPPC application history via the register numbering system, thereby providing more user-friendly access to information.
- Facilitate the reviewing of licence applications in order to meet the requirements of the IPPC Directive, Landfill Directive, Waste Incineration Directive etc.
- Facilitate the high volume of new IPPC applications anticipated in late 2006, 2007 and beyond.
