Dear Sirs,

To tell you how devastated I am with the plans to construct the landfill at Nevitt North Co Dublin is an understatement. ^{Why} ~~What~~ With so much research is it that landfill is the only option for our countryside and why is it the only option in an area that already has a landfill. The EPA does not seem to be focusing on or working hard enough on the National Waste Prevention Programme. With other options available why is this second landfill still a possibility. I strongly object and don't understand

For inspection purposes only.
Consent copyright notice required for any other use.

Why the Assessments being made are not as thorough as they should be. Myself and my family will not remain in this area if the landfill is approved. I have 5 children under the age of 8 years and am terrified with ~~this~~ thoughts of it going ahead. The upheaval for us alone has caused me to suffer stress for the last few months at the thoughts that remaining in my beautiful home could cause health problems for my children my husband and I.

Here is the report or

results of the Strategic Environmental Assessment which was to be carried out by Fungal Co. Co.

I am devastated. Its just not good enough.

I await your reply soon.
