Dear Sirs,

With reference to our previous  
correspondence with you on the above  
matter we wish to notify you of the  
following important outcome of our  
enquiries to date

- The proposed landfill lies on top  
of a regionally important gravel  
aquifer.
- This gravel aquifer overlies a  
regionally important proposed

bedrock aquifer.

- The water quality is categorized by the EPA as of the highest quality i.e. zero coliforms and  $< 5 \text{ mg/l}$  ref. M. CRAIG, WATER QUALITY IN IRELAND 2005.

We intend to submit our findings to the GSI immediately, with a request for the reclassification of both aquifers.

Yours truly

Patrick Doyle B.Sc.

P.P. DECLAN WHITE B.Sc. Eng.
