RE:	Technical Amendment of Mulleady's Limited Waste Licence (Register No W0169-01)

The Agency received correspondence from Mulleady's Ltd on 27th October 2005 requesting a Technical Amendment of their licence to provide for :

- (i) A change to Condition 3.4.2, which would allow the licensee to move plant from the licensed site to an adjoining site for maintenance purposes. Such movement of plant would have been prohibited under the terms of the licence.
- (ii) The placement of a quantity of C&D waste on the site of the activity in order to correct ground levels.

The Technical Amendment attached provides for the change requested in (i) above, but the change sought at (ii) above has not been included in the scope of this Technical Amendment. The licensee can, through discussion with the OEE Inspector, proceed with the use of a limited quantity of C&D waste on the site of the activity for valid site-engineering purposes.

Signed

Frank Clinton
