Re: WO 231-01
Proposed Landfill at Tooman/Nevitt, North County Dublin.

A Chara,

As I contemplate the Nevitt Lusk Actions Group's meeting with you on Friday 26th of Jan 2007 at the EPA Offices in Clonskeagh, maybe you can clarify a few issues for me.

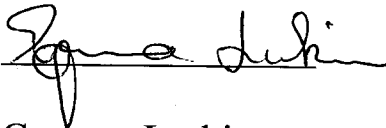

1. When discussing Fingal County Councils non compliance with your request, to them, to carry out modflow modelling . Is it accurate to say that you decided after discussion with Fingal County Council that there was no need them carrying out this modelling .
2. Do the EPA intend caring out Modflow modelling or getting an independent company to carry out this modelling??

NLAG feel it is essential that Modflow or some similar modelling should be carried out and the results been made available.

NLAG feel that a Licence can not be granted without modelling of this nature been carried out, as there is no way of knowing the true effect of the landfill on the ground water in the short or long term.

Looking forward to a response,

Yours Faithfully,

Gemma Larkin
