

SECTION G3: IMPACT MITIGATION

Provide details on a programme of improvements to ensure that discharges from the agglomeration will not result in significant environmental pollution.

The programme of improvements in respect of the Waste Water Works are outlined in Attachment B10 (Capital Investment Programme) of this Application. All such improvement works will ensure that discharges from the agglomeration will not result in significant environmental pollution.

Reference is also made to Attachment B6 (Planning Permission & EIS) of this Application and the EIS in particular. The EIS demonstrates that the primary discharge from the agglomeration does not result in significant environmental pollution.

Future Needs Assessment will ensure that all discharges from the agglomeration will not result in significant environmental pollution.
