Attention: Ms Yvonne Furlong

Your ref: W0241-01/13th March

**Re: IPPC licence review application, Greenstar Ltd, Clavass,
Enniscorthy, County Wexford.**

Dear Ms Furlong,

I refer to your letter of 13th March 2008 re the above and wish to advise as follows:

Disposal of storm water

There is no public storm water sewer in this area and no immediate plans for one. Greenstar Ltd have recently applied to WCC for planning permission and I have been advised by the area engineer that Greenstar Ltd are considering the construction of a private storm water sewer to serve their development.

Disposal of domestic/industrial sewage

Wexford County Council have no objection in principal to the disposal of effluent in accordance with the revised information attached to your above referenced letter, subject to the general principle that such waste must not be deleterious to the public sewerage infrastructure. The existing sewerage rising main which Greenstar Ltd intend using is in private ownership, however Wexford County Council should be advised by Greenstar Ltd as soon as effluent is being discharged from their site.

Wexford County Council do intend extending the public (foul) sewer in this area but it is unlikely that this will be constructed prior to 2012.

Water Connection

Greenstar Ltd must make a formal application to Wexford County Council for a water connection at the appropriate time.

Céad bliain ag tabhairt seirbhíse don phobal

Annual Charges

Greenstar Ltd will be subject to the prevailing annual charges for drinking water and waste water based on the water in water out principle.

Yours sincerely,

Daragh Cullinan
Senior Engineer
Water Services

Cc. Mr Craig Innes Area Engineer
