

Statement of Damien Christy
Local Resident

Issues of the habitat distruction

- Observations made over the last 20 years or so
- When compared to the rest of Fingal, this location possesses habitat of an unusually high quality
- This habitat is capable of supporting an exceptionally plentiful and healthy wild life population.
- In my opinion an area such as Fingal can not afford to lose anymore of these irreplaceable qualities

The proposed site is in close proximity to the existing landfill Balally, and Balally can be physically seen from the proposed site.

The people and landscapes of the general area of Lusk have sacrificed more than enough as it is towards dealing with refuse dumps without yet another one being landed on their door steps.
