Subject: Waste License Application W0241-01

Yvonne,

Further to our telephone conversation this morning concerning the submission of additional information in relation the Waste Licence application for the proposed Greenstar MRF at Clavass Enniscorthy. In response to discussions with the planning authority, as part of the planning application process, there have been changes to the site layout, boundary lines and surface water drainage system. A specialist archaeological and architectural heritage survey has also been carried out. These changes require the amendment to the site drawings and the EIS. It was our intention to submit the amended drawings and EIS to the Agency this week, but the compilation has been delayed. In relation to the sewage pumping station to the south of the application site, I confirm that the faulty pump has been replaced.

I hope to submit the outstanding information next week. I appreciate the speed with which the Agency has processed the Licence application and apologise for any inconvenience caused by the delay.

Regards,

Jim O'Callaghan
