Daragh, thank you very much for getting back to me.
I am now going to go ahead with this licence application based on the figures agreed. Thanks again for your help, it is much appreciated.

Best Regards
Yvonne

Yvonne, I wish to confirm that the figures quoted i.e annual total flow approximately $(2.3\text{m}^3 + 1.58\text{m}^3) \times 52 = 202\text{m}^3/\text{year}$ of BOD approx 3500mg/l with a maximum daily flow of $2.3\text{m}^3 + 1.58\text{m}^3 = 2.04\text{m}^3 @ 3500 \text{ mg/l}$ BOD equivalent to a p.e of approximately 119 is acceptable to WCC

Importance: High

Hi Daragh,

As per telephone conversation, please find the estimated weekly and daily flows to sewer for the Greenstar, Enniscorthy facility.
As you are aware these figures are estimates.

Please advise whether Wexford Co. Co. have an issue with these figures.

Best Regards
Yvonne

Yvonne,

The estimated weekly and daily flows to the sewer are as follows:

Wheel wash 2.3m³/week: 0.46m³/day, assuming it is used 5 working days

Floor washdown 1.58m³ per week, assume it is only washed down once per week.

As discussed, these are estimates based on the assumptions given above.

I am away from the office next week, but if you need any further informaiton please contact Miachael Watson, his e-mail address is michael@ocallaghanmoran.com

Regards,

Jim O'Callaghan
