#### APPLICATION TO THE ENVIRONMENTAL PROTECTION AGENCY FOR A WASTE WATER DISCHARGE LICENCE

In accordance with the Waste Water Discharge (Authorisation) Regulations 2007, S.I. No. 684 of 2007, Water Services (Western Division), Cork County Council, Courthouse, Skibbereen, Co. Cork is applying to the Environmental Protection Agency for a Waste Water Discharge Licence for Bantry Agglomeration, Bantry, Co. Cork at the following locations:

| Discharge Type | Function      | Townland   | Receptor       | Grid Reference  |
|----------------|---------------|------------|----------------|-----------------|
| Primary        | Main Outfall  | Seafield   | Bantry Harbour | E098665 N048326 |
| Secondary      | Minor Outfall | Reenrour   | Alley River    | E099761 N048432 |
|                |               | West       |                |                 |
| Secondary      | Minor Outfall | Town Lots  | Mill River     | E099733 N048352 |
| Secondary      | Emergency     | Town Lots  | Bantry Harbour | E099274 N048609 |
| Secondary      | Emergency     | Reenrour   | Covenet        | E099507 N049248 |
|                |               | West       | 119: 2119      |                 |
| Secondary      | Emergency     | Seafield 💒 | Eocal Stream   | E098918 N047734 |

Cork County Council proposes to provide a wastewater treatment plant at Beach, Bantry, Co. Cork, Grid Reference (E096147, N050148). It is proposed to discharge treated wastewater from this plant to Bantry Harbour. The proposed location is detailed in the table below:

| Discharge Type | Function | Townland | Receptor       | Grid Reference   |
|----------------|----------|----------|----------------|------------------|
| Primary        | Main     | Beach    | Bantry Harbour | E096802, N048205 |

It is intended to submit the Environmental Impact Statement associated with the proposed provision of a Waste Water Treatment Plant in Bantry to the Agency along with the Application.

A copy of the application for the Waste Water Discharge Licence, the Environmental Impact Statement and such further information relating to the application as may be furnished to the Agency in the course of the Agency's consideration of the Application shall as soon as is practicable after receipt by the Agency be available for inspection or purchase at the

All Wicklow County Council schemes fall within the Greater Dublin Area as described in the National Spatial Strategy

# Attachment B.12 Foreshore Act Licences

#### 2 March 2007

#### **SPECIFIC CONDITIONS (Licence)**

#### 1. The Licensee:

(i) shall use that part of the foreshore, the subject matter of this Licence, for the purpose of constructing and maintaining (a) a 250mm diameter rising main,(b) a 400mm diameter outfall at Blue Hill and for expanding the capacity and maintaining (a) two 450mm diameter outfalls at Wolfe Tone Square, (b) a 250mm diameter outfall at Blackrock, as part of Cork County Councils Sewerage Treatment Plant development for the town of Bantry, Co Cork (hereinafter referred to as the works), in accordance with the plan and location drawings\*, as submitted to, and approved by, the Minister for Communications Marine and Natural Resources; (hereinafter referred to as the Minister) and for no other purpose whatsoever;

# \* Drawing No's. A8763-N103, A8763-N105, A8763-N106, A8763-N107, A8763-N108, A8763-N109 and A8763-N110

- (ii) may also use adjacent foreshore but only to the extent necessary for the purpose of constructing and maintaining the said works and shall restore the said foreshore to its proper condition immediately after such use.
- 2. The Licensee shall, prior to commencement of works:
  - provide certification by a Chartered Engineer stating that the works have been designed in accordance with relevant Irish or British Standard Specifications or Codes of Practice for strength, stability and durability, taking into account current building regulations and safety legislation;
  - (ii) provide for the approval of the Minister, a detailed Construction and Method Statement for carrying out the works and for the disposal of excavated material;
  - (iii) give the Minister for Communications, Marine and Natural Resources 14 days notice;
  - (iv) apply to the Commissioners of Irish Lights for sanction of new navigational aids/buoyage and/or alteration of existing navigational aids/buoyage;
  - (v) notify the British Admiralty Hydrographic Office, of the location, nature and timing of the works;
  - (vi) arrange for the publication of a local marine notice. This local marine notice should give a general description of operations and approximate dates of commencement and completion. A notice in a locally read newspaper at least two weeks prior to commencement of operations will suffice;

- (vii) notify the local Harbour Master with respect to the safety of navigation of marine traffic in the river.
- 3. The Licensee shall, during the construction phase:
  - (i) ensure that floating plant or machinery used in connection with the works is adequately lit if in place at night or during times of poor visibility;
  - (ii) ensure that all vessels engaged in the works comply fully with the relevant certification requirements;
  - (iii) ensure that work is carried out in an environmentally friendly manner so as to minimise the impact on the foreshore and the surrounding environs;
  - (iv) ensure that proper environmental controls and monitoring are carried out during the construction phase of the various elements, as there are major aquaculture farming activities in the harbour. It is essential that construction/excavation/dredging sediments are not released into the water column;
  - (v) comply with all lawful instructions given by the Heritage and Planning Division of the Department of the Environment, Heritage and Local Government in relation to work on the foreshore area the subject of this Licence or the surrounding area;
  - (vi) ensure that all impacts into the foreshore and sub-tidal zone are subject to archaeological monitoring. This should be undertaken by a suitably qualified archaeologist with marine/underwater experience and should be licensed to the Department of Environment, Heritage and Local Government;
  - (vii) ensure that the monitoring licence application is accompanied by a detailed method, statement and this should include details of plant/dredger type, duration of works and extent of works. The methodology should also include a find's retrieval strategy and details of the proposed archaeological monitoring team;
  - (viii) ensure that if significant archaeological remains are found during the archaeological monitoring, the monitoring archaeologist will have the power to have the works stopped. The works operator shall be prepared to move away from the area until the potential archaeology has been properly inspected and fully resolved. The developer shall be prepared to be advised by the Underwater Archaeology Unit of the Department of Environment, Heritage and Local Government in this regard;
  - (ix) ensure the diffusers are marked by a high visibility coloured float or similar to indicate position of same and hence discourage vessels anchoring in close proximity.
- 4. The Licensee shall ensure, that, in the event of any spillage or accident occurring below the high water mark of ordinary or medium tides, or above the high water

mark, which may impact on the foreshore during the carrying out of the works the subject of this Licence, or during operations following the completion of the works, the Irish Coast Guard is notified immediately by telephone.

- (a) The effluent discharged from the treatment plant outfall pipe shall have a maximum 5-day B.O.D. concentration of 25 mg/l and a maximum suspended solids concentration of 35 mg/l, on a 95% basis. The maximum total daily B.O.D. load discharged from the treatment plant outfall shall not exceed 40 kgs;
  - (b) The effluent from the Waste Water Treatment Plant shall be sampled twice monthly immediately downstream from the plant and immediately prior to discharge. These samples shall be tested for 5-day B.O.D. and for suspended solids concentration;
  - (c) A report on the operation of the treatment plant and compliance with these discharge conditions, including the results of the sample analyses above, shall be submitted to the Department of Communications, Marine and Natural Resources, Coastal Zone Management Division, annually;
  - (d) Should sample analysis indicate that the plant is not operating to design specifications the Licensee shall inform the Department of Communications, Marine and Natural Resources, Coastal Zone Management Division, as soon as possible;
  - (e) The analyses should be carried out in an accredited laboratory;
  - (f) The cost of all the aforementioned sampling and monitoring shall be borne by the Licensee.
- 6. The Licensee shall ensure that any malfunction or stoppage breakdown of the effluent treatment system shall be notified immediately to the local Sea Fishery Officers of the Sea Fisheries Protection Authority,(Udaras um Chosaint Iascaigh Mhara) so that any health problems posed for shellfish downstream can be contained.
- 7. The Licensee shall, on completion of the works:
  - (i) provide detailed location coordinates for the completed work;
  - (ii) within two months, provide certification by a Chartered Engineer that the works have been completed in accordance with the plans/drawings approved of by the Minister and with the said Specifications or Codes of Practice;
  - (iii) ensure that no material or debris remains at the site;
  - (iv) make good, to the satisfaction of the Minister, any damage caused to the foreshore;
  - (v) agree a sampling programme to monitor water quality with the Department of Communications, Marine and Natural Resources before

the scheme comes into operation in order to ensure compliance with SI No, 268 of 2006.

8. The conditions of this licence are subject to review in the light of any legislative changes or improved standards in the interest of public health.

Consent of conviction of the required for any other use.

#### 2 March 2007

#### **DRAFT SPECIFIC CONDITIONS (Section 10 Permission)**

#### 1. The Grantee:

(i) shall use that part of the foreshore, the subject matter of this permission, for the purpose of constructing and maintaining (a) a 400mm diameter Emergency Outfall at Old Quay Pump House, (b) a 200mm diameter Scour Valve Chamber and (c) a 250mm diameter Rising Main and for expanding the capacity and maintaining a 250mm diameter outfall at Black Rock as part of Cork County Councils Sewerage Treatment Plant development for the town of Bantry, Co Cork (hereinafter referred to as the works), in accordance with the plan and location drawings\*, as submitted to, and approved by, the Minister for Communications Marine and Natural Resources; (hereinafter referred to as the Minister) and for no other purpose whatsoever;

# \* Drawing No's. A8763-N101 A8763-N102, A8763-N103, A8763-N105 and A8763-N110

- (ii) may also use adjacent foreshore but only to the extent necessary for the purpose of constructing and maintaining the said works and shall restore the said foreshore to its proper condition immediately after such use.
- 2. The Grantee shall, prior to commencement of works:
  - provide certification by a Chartered Engineer stating that the works have been designed in accordance with relevant Irish or British Standard Specifications or Codes of Practice for strength, stability and durability, taking into account current building regulations and safety legislation;
  - (ii) provide for the approval of the Minister, a detailed Construction and Method Statement for carrying out the works and for the disposal of excavated material;
  - (iii) give the Minister for Communications, Marine and Natural Resources 14 days notice;
  - (iv) apply to the Commissioners of Irish Lights for sanction of new navigational aids/buoyage and/or alteration of existing navigational aids/buoyage;
  - (v) notify the British Admiralty Hydrographic Office, of the location, nature and timing of the works;
  - (vi) arrange for the publication of a local marine notice. This local marine notice should give a general description of operations and approximate dates of commencement and completion. A notice in a locally read newspaper at least two weeks prior to commencement of operations will suffice;

- (vii) notify the local Harbour Master with respect to the safety of navigation of marine traffic in the river.
- 3. The Grantee shall, during the construction phase:
  - (i) ensure that floating plant or machinery used in connection with the works is adequately lit if in place at night or during times of poor visibility;
  - (ii) ensure that all vessels engaged in the works comply fully with the relevant certification requirements;
  - (iii) ensure that work is carried out in an environmentally friendly manner so as to minimise the impact on the foreshore and the surrounding environs;
  - (iv) ensure that proper environmental controls and monitoring are carried out during the construction phase of the various elements, as there are major aquaculture farming activities in the harbour. It is essential that construction/excavation/dredging sediments are not released into the water column;
  - (v) comply with all lawful instructions given by the Heritage and Planning Division of the Department of the Environment, Heritage and Local Government in relation to work on the foreshore area the subject of this Permission or the surrounding area;
  - (vi) ensure that all impacts into the foreshore and sub-tidal zone are subject to archaeological monitoring. This should be undertaken by a suitably qualified archaeologist with marine/underwater experience and should be licensed to the Department of Environment, Heritage and Local Government;
  - (vii) ensure that the monitoring licence application is accompanied by a detailed method, statement and this should include details of plant/dredger type, duration of works and extent of works. The methodology should also include a find's retrieval strategy and details of the proposed archaeological monitoring team;
  - (viii) ensure that if significant archaeological remains are found during the archaeological monitoring, the monitoring archaeologist will have the power to have the works stopped. The works operator shall be prepared to move away from the area until the potential archaeology has been properly inspected and fully resolved. The developer shall be prepared to be advised by the Underwater Archaeology Unit of the Department of Environment, Heritage and Local Government in this regard;
  - (ix) ensure the diffusers are marked by a high visibility coloured float or similar to indicate position of same and hence discourage vessels anchoring in close proximity.
- 4. The Grantee shall ensure, that, in the event of any spillage or accident occurring below the high water mark of ordinary or medium tides, or above the high water mark, which may impact on the foreshore during the carrying out of the works the

subject of this Permission, or during operations following the completion of the works, the Irish Coast Guard is notified immediately by telephone.

- 5. (a) The effluent discharged from the treatment plant outfall pipe shall have a maximum 5-day B.O.D. concentration of 25 mg/l and a maximum suspended solids concentration of 35 mg/l, on a 95% basis. The maximum total daily B.O.D. load discharged from the treatment plant outfall shall not exceed 40 kgs;
  - (b) The effluent from the Waste Water Treatment Plant shall be sampled twice monthly immediately downstream from the plant and immediately prior to discharge. These samples shall be tested for 5-day B.O.D. and for suspended solids concentration;
  - (c) A report on the operation of the treatment plant and compliance with these discharge conditions, including the results of the sample analyses above, shall be submitted to the Department of Communications, Marine and Natural Resources, Coastal Zone Management Division, annually;
  - (d) Should sample analysis indicate that the plant is not operating to design specifications the Grantee shall inform the Department of Communications, Marine and Natural Resources, Coastal Zone Management Division, as soon as possible;
  - (e) The analyses should be carried out in an accredited laboratory;
  - (f) The cost of all the aforementioned sampling and monitoring shall be borne by the Grantee.
- 6. The Grantee shall ensure that any malfunction or stoppage breakdown of the effluent treatment system shall be notified immediately to the local Sea Fishery Officers of the Sea Fisheries Protection Authority,(Udaras um Chosaint Iascaigh Mhara) so that any health problems posed for shellfish downstream can be contained.
- 7. The Grantee shall, on completion of the works:
  - (i) provide detailed location coordinates for the completed work;
  - (ii) within two months, provide certification by a Chartered Engineer that the works have been completed in accordance with the plans/drawings approved of by the Minister and with the said Specifications or Codes of Practice;
  - (iii) agree a sampling programme to monitor water quality with the Department of Communications, Marine and Natural Resources before the scheme comes into operation in order to ensure compliance with SI No, 268 of 2006.

- 8. The Grantee shall ensure that the engineering detail of the main outfall (400mm diameter) will be amended as part of the proposed marina development when the layout for same is finalised.
- 9. The conditions of this permission are subject to review in the light of any legislative changes or improved standards in the interest of public health.

Consent of convisition purposes only any other use.

tuskar rock marine

Rosslare Harbour, Co Wexford, Ireland

# Divers report – Bantry Outfall pipe 16th October 2007 – Ref 2007TRM1004

#### **Dive Team**

| Supervisor | Mick Hyland  |
|------------|--------------|
| Diver      | Gavin Bean   |
| Diver      | Tom Czere    |
| Diver      | Ciarán Duffy |

#### **OUTFALL PIPE IN BANTRY**

Tuskar Rock Marine were engaged to conduct an underwater video survey of a sewerage outfall pipeline at the above mentioned location.

The pipe was located approximately 10m to the left of a small opening in the main sea/roadway wall on the approach road to Bantry Town past the graveyard on the left.

The pipe is sitting on the seabed incorporated into a concrete block. The concrete block covers the entire pipe except for a 2m section approximately 10m inshore of the diffuser. At this point the pipe is exposed and a flange is visible. There are areas along the pipe where there is freespanning - max depth of freespanning is 200mm. The pipe itself is made from cast iron, 240mm I.D with a wall thickness of approx 18mm. Where the pipeline is visible, there are signs of corrosion.

A one meter section at end of pipeline sticks up at approximately 45 degrees from the seabed and has a slight covering of marine growth on it - the open ended section is the diffuser on the pipe and it appeared to be diffusing normally as can be seen on the DVD.

Using a measuring tape a depth reading was taken from the highest point of the diffuser to the water level which was 4.060m. Then a reading was taken from seabed to water level which was 5.100m. The time of the reading was 17:48 - please refer to Bantry tide tables attached.

Distance measurements were taken and recorded by a Cork Co Co Engineer from two points along the pipe to a fixed point at the road opening.
