Aiva,

Excuse me if I have mis-spelt your first name, I did not verify spelling when we spoke.

Find attached a map we have prepared for your reference (not an official submission relating to Waste Licence Application). On it you will see the location of our site represented by a magenta dot and the nearest mapped streams (EPA rivers data set). We have indicated with a red line the presumed direction of flow of the drain at the North of our site, this would of course have to be verified by walking the land. We will endeavor to obtain permission from the relevant land owners to undertake this and if we have success, will revert.

We believe that this drain is a land drain which was constructed in order to drain the surrounding agricultural land.

If you need further information, please contact us.

Regards

Garrett Leech
