9th February 2009

Ref: Mr John Gibbons

Dear John,

Soltec wish to apply for a technical amendment to its licence (No WO115-01) in order to store dry solid material (EWC Code 150202, EWC 080111, EWC 150110*, EWC 1502, EWC 150104, EWC 150106, EWC 150107) which it has been doing since 2003 on a pilot scheme.

Please find attached copies of letters to EPA dated 18/07/03 and 12/02/04.

Hope this is to your satisfaction but should you have any further queries please do not hesitate to contact the undersigned.

Yours Sincerely,

Michael Corcoran

RE: NOTIFICATION OF NON COMPLIANCE 115-1

Ref Ms Olivia Cunningham

We refer to your recent site visit on 14 January 2004 and notification of non compliance dated 3 February 2004 and wish to respond as follows:

1.0 Air Emissions A2

We have requested EURO environmental services to prepare a proposal on the upgrade and treatment of air emissions from A2. They have recommended a separation chamber together with an activated carbon bed. We attach their proposal.

2.0 Groundwater Monitoring Point MW1

The groundwater monitoring point MW1 has now been repaired.

3.0 Storage of barrels in unbunded areas

All barrels containing liquid waste and solvent are now stored in certified banded areas as per SOP 9A.23, PN15 and PN08.

4.0 Labelling of barrels

All barrels are labelled in accordance with our labelling procedures as per our Environmental Management System.

We purchased the storage container from Chem Store who are suppliers of chemical storage housing. The unit is constructed of steel which is a non combustible material. Vents have been fitted at the bottom of the walls, 2 at the entrance and 2 at the rear. The floors and walls are sealed and the floor is fitted with a banded section which meets the 110%/25% rule. The floors of the storage area have the same height as nearby buildings. The storage area is also fitted with steel doors which meet the minimum 30 minute fire rating. We have referred to the draft BAT reference document on emissions from storage dated July 2003.
