12th August 2009

Ref: Donohill Landfill W0074-02

RE: Total Quantity of Waste to be Placed at the Landfill.

Dear Ms. Babiarczyk,

Further to your request for information, the total quantity of waste to be placed at Donohill Landfill over the life of the facility is 414,300 tonnes.

This figure was calculated using waste records which show that 383,306 tonnes of waste was placed in the landfill up to the end of July 2009. This amount was measured at the weighbridge from 2000 and was estimated before this date.

The most recent Volumetric Analysis Report which was carried out on 25-08-08 was also used to obtain the final total quantity of waste. At this time there was a potential void space of 41,500m³. We generally get a compaction rate of 1.18 tonnes of waste for 1m³ void space. Since the analysis was carried out 17,976.5 tonnes of waste has been added to the landfill, which would take up 15,234m³ of void. This leaves 26,266m³ of void space remaining onsite as of 01st August 2009. 26,266m³ of waste is equivalent to 30,994 tonnes of waste.

If you have any queries please do not hesitate to contact this office.

Yours sincerely,

Louise Ryan
Landfill Manager
